## DESCRIPTION OF INNOVATION

(Background of innovation / Trigger of ideas / Problem statement)

SKADIS box it solves problems like keys, bills and letters in one place. To address the issue, we plan to produce this product the purpose of this product is to solve problems encountered with keys, bills, and letters additions can be wall decor. The product is called "Skadis", the word is from Sweden. The purpose of the project is to obtain the name because the country has a leading manufacturer of imported furniture items such as Ikea. In other words, "Skadis" has the meaning of its own characteristics that can be attributed to the results of this product. Examples of his attributes are creative, cheerful and modern. The creative features of this product are the result of a designed pattern. This product has a honeycomb-like pattern. In addition, the second feature is cheerful. This product has a colour vision as it is used almost entirely with pallet and pegboard. Last but not least is the modernization of this product. Seeing the previous product has a problem with the storage limit.

## THE IMPACT OF INNOVATION

(Advantage / Market potential / Extensive innovation)

This Skadis Box product that made for anyone in need. But this product have a commercial value that can be market as requested

## OBJECTIVE
