**INSTRUCTION:**

This section consists of **TWO (2)** structured questions. Answer **ALL** questions.

**ARAHAN:**

*Bahagian ini mengandungi **DUA(2)** soalan struktur. Jawab **SEMUA** soalan.*

**QUESTION 1**

**SOALAN 1**

CLO1  
C3

- (a) i. Probability sampling technique is used when researcher plans to make inferences about the population of interest. One type of probability sampling techniques is systematic sampling. Explain the systematic sampling calculation steps with example.

*Teknik pensampelan kebarangkalian digunakan apabila penyelidik bercadang untuk membuat kesimpulan mengenai populasi yang berminat. Salah satu teknik pensampelan kebarangkalian ialah pensampelan sistematik. Terangkan langkah pengiraan persampelan sistematik beserta contoh.*

## QUESTION 2

### SOALAN 2

CLO1  
C3

- (a) A sample of 10 students in DBK showed the following credit hours taken during the second year of their programme. Identify range, mean, median and mode.
- 10 sampel pelajar DBK menunjukkan jam kredit yang telah diambil oleh mereka semasa berada di tahun kedua program. Tentukan julat, purata, median dan mod.*

- (b) In annual PSA Woodball Club election, there are three possible candidates. The probability of Mr Jefri, Mr. Kamal and Mr. Mawi being nominated are 0.15, 0.55 and 0.30 respectively. If the nominated candidates take part in the election, the probabilities that the election won by Mr Jefri, Mr Kamal and Mr. Mawi are 0.5, 0.65 and 0.4 respectively.

*Dalam pemilihan tahunan Kelab Woodball PSA, terdapat tiga kemungkinan Calon. Kebarangkalian Encik Jefri, Encik Kamal dan Encik Mawi dicalonkan masing-masing adalah 0.15, 0.55 dan 0.30. Sekiranya calon yang dicalonkan mengambil bahagian dalam pemilihan, kebarangkalian dimenangi oleh Encik Jefri, Encik Kamal dan Encik Mawi masing-masing adalah 0.5, 0.65 dan 0.4.*

- i. Construct a tree diagram for the above information

*Bina gambarajah pokok untuk maklumat di atas.*
