FOREWORD

Assalamualaikum warahmatullahi wabarakatuh,

Entrepreneurship is the main agenda in producing many entrepreneurs among students and graduates. This is enshrined under the Entrepreneurship Action Plan of the Integrated Institute of Higher Education Institutions (PTK IPT) Malaysia.

Being selected twice in the competition for the nomination of the Best Institutional Entrepreneurship Award organized by the Ministry of Higher Education in 2018 and 2021 provided a precious experience. Especially when PSA has crowned the best entrepreneurial institution for Malaysian polytechnics in 2021, this award is a recognition of the unwavering efforts of PSA staff to ensure this success is achieved.

The hard work of all departments, centres and units has transformed the entrepreneurial landscape that develops a synergistic and holistic ecosystem across all areas of PSA. In addition, the entrepreneurial model developed in line with the development of students to produce a balanced and entrepreneurial-minded TVET human capital. This further strengthens the excellent entrepreneurial ecosystem.

Strategic entrepreneurial network involvement in and out has been leveraged to strengthen entrepreneurship based on innovation and technology. PSA has developed a strategic framework that forms an entrepreneurial ecosystem focused on academic, industrial, government and community excellence in the country's higher education entrepreneurial landscape. May this success be a sticking point for PSA to enhance further its efforts to develop the PSA entrepreneurial ecosystem. In turn, maintaining superior performance in achieving performance indicators (KPIs) will produce more job creators in the future.

Dr. Hj. Mohd Zahari bin Ismail
Director
Sultan Salahuddin Abdul Aziz Shah Polytechnic

FOREWORD

Assalamualaikum warahmatullahi wabarakatuh. Greetings of the PSA entrepreneur's family.

The Premier Entrepreneurship Centre is responsible for developing an entrepreneurial mindset among PSA students. This centre coordinates all entrepreneurial programs and activities to produce holistic and entrepreneurial graduates. Developing entrepreneurs among students is a challenging job. It takes a long time, careful planning and constant improvement of strategies and methods of implementation. However, cooperation with all parties, especially the main department, can ensure the success of achieving the KPIs and the objectives set have been implemented.

PSA's entrepreneurial model is based on the Entrepreneurship Action Plan resulting in a combination of four essential components: F.I.T.C., Funding, Innovation, Technology and Innovation. All developed planning is in line with this model. May this model succeed in producing a holistic, balanced and entrepreneurial-minded TVET human capital.

In 2021 PEC recorded a tremendous success as it has won the Best Entrepreneurship Institution Award 2021. This success proves that the developed systems and models can produce balanced, holistic and entrepreneurial students. This success was achieved through the efforts of all parties, from the Director to students who are creative and ambitious.

Indeed, I am very grateful for the commitment of all parties, especially the lecturers in their respective fields. Therefore, I would like to thank all the lecturers, staff and students of PSA for mobilizing entrepreneurial activities at PSA to achieve success at the national level. Hopefully, this effort and cooperation will continue, and this performance will be maintained in the future.

Zaharatul Akmar binti Ahmad Zainuddin
Head of Premier Entrepreneurship Centre
Sultan Salahuddin Abdul Aziz Shah Polytechnic

EXECUTIVE SUMMARY

Since its establishment in 1997, Politeknik Sultan Salahuddin Abdul Aziz Shah (PSA) is constantly evolving to forge ahead as a leading edge TVET institution in Malaysia. As a premier polytechnic, there are numerous efforts put forth by the institution to create a holistic and conducive entrepreneurship ecosystem as emphasized in the 2030 National Entrepreneurship Policy's 1st thrust. One of the major steps taken by PSA is by establishing Premier Entrepreneurship Centre (PEC) to serve as a hub to facilitate all entrepreneurial activities in PSA. To push the entrepreneurial enthusiasts to the next level, the formation of the Centre for Research, Innovation and Commercialization (CRI) has fruitfully put PSA in the limelight; through the triumphs and recognitions in numerous innovation projects and research papers. Also, PSA has built strong affiliations with entrepreneurial entities from various industries through its Corporate Industrial Services & Employment Centre (CISEC). On top of the fame and glory, PSA has never forgotten to give back to the community through the Social Innovation & Social Entrepreneurship (SESI) projects. To date, PSA has produced more than 500 entrepreneurs with the support of trained and certified mentors. PSA has geared up to stay abreast with the new digital world through big data analytics and the Entrepreneurial Database. The Centre for Medical Electronics Technology has also formed a solid entrepreneurial ground in PSA through the partnerships, knowledge sharing, services and trainings provided. Moving forward, PSA intends to produce more global ranking successful entrepreneurs and job creators in the future.

ABOUT US

STRATEGY

Politeknik Sultan Salahuddin Abdul Aziz Shah (PSA) is constantly aligning its strategy, process, structure, people and technology to convert opportunities to gains.

Its strategic approach leads its staff and students to a clear route to sail towards embracing its vision and mission.

PSA sets the tone for the organisation through the institutional strategic planning and action plans, centred on the 5i shared values :

Integrity Immersive Innovative
Integrated Impactful

Abdul Aziz Shah

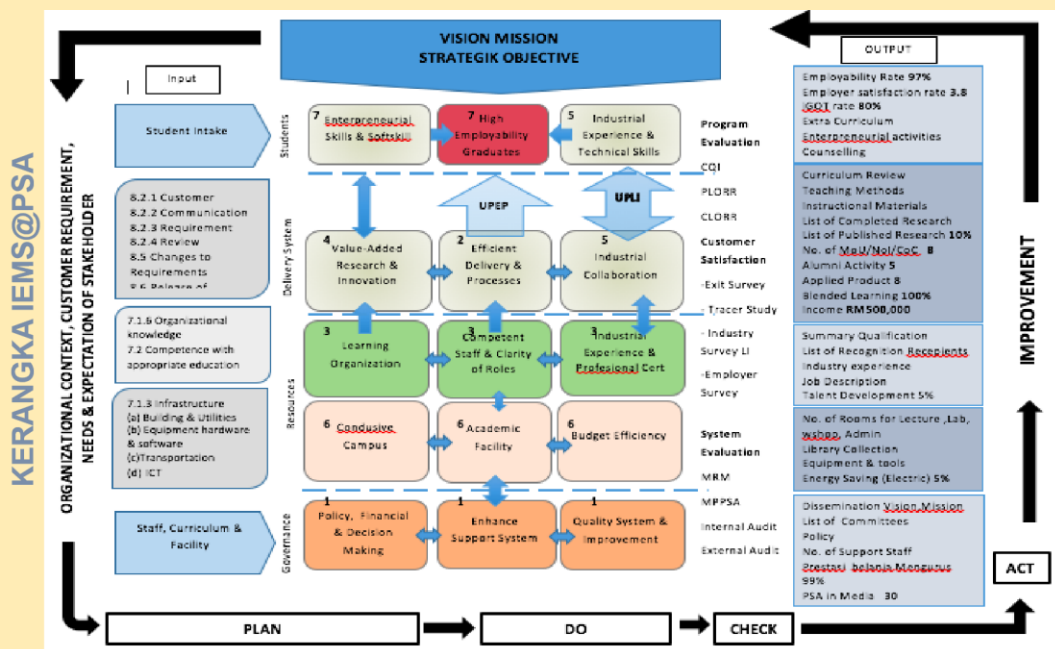

PROCESS

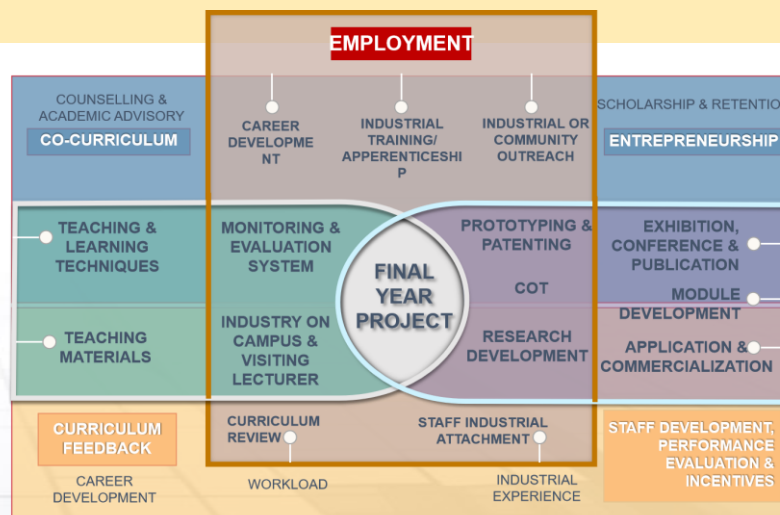

ABOUT US

In becoming an eminent tertiary education institution, PSA has incorporated an integrated system to comply with all standard requirements called **Integrated Excellence Management System (IEMS)** to manage the seven core operational processes:

K1: Governance, **K2 :** Teaching & Learning, **K3 :** Staff, **K4 :** Research & Innovation, **K5 :** Image and Sustainability, **K6 :** Resources, **K7 :** Students. (APACC Criteria)

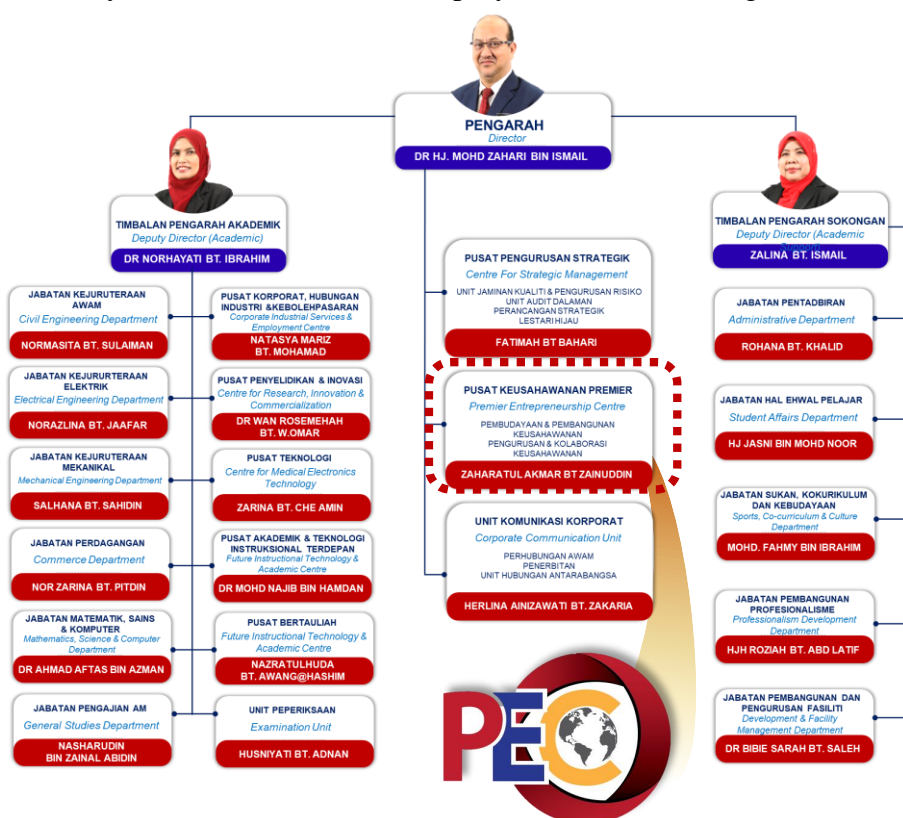

K1 SWOT & STRATEGIC PLANNING FINANCIAL & QMS K6 RESOURCES

STRUCTURE

ABOUT US

PSA employs a hybrid approach for its organizational structure that integrates both process and functions; to facilitate the seven core operational processes under the IEMS system to achieve its institutional goals. Each department, centre, and unit are placed directly under the director and deputy directors following their strengths and fortes.

DR MOHD ZAHARI BIN ISMAIL

PhD in Management, focused on Entrepreneurship Development in Malaysian Polytechnic

Chairman of Entrepreneurship for Central Zone

The multidisciplinary strength contrived through the integration between PSA's Centres of Technology (COT) and its Centres of Excellence has consolidated a comprehensive entrepreneurial foundation in PSA.

Future Instructional Technology & Academic Centre combines CAD and CMT together and is put under the supervision of TPA to strengthen the pedagogical approaches in teaching and to develop high quality learning materials following the latest technology.

FITAC

Reporting directly to the director, Premier Entrepreneurship Centre, which was formerly known as UED, is now assigned with a wider job scope; to oversee all entrepreneurial activities and achievements in PSA.

PEC

Under the supervision of COT, Technology of Robotic & IOT Centre focuses on developing competency and expertise of robotics and IoT applications among students.

TRIC

CENTRES OF EXCELLENCE

CRI

This centre plays vital roles in stimulating growth and excellence among individuals and group in PSA through innovative thinking. It creates opportunities for greater wealth through first-rate research papers, outstanding innovation projects and product commercialization.

It is a centre under the patronage of TPA that offers upskilling, reskilling and cross-skilling training among students and lecturers, as well as industrial workers.

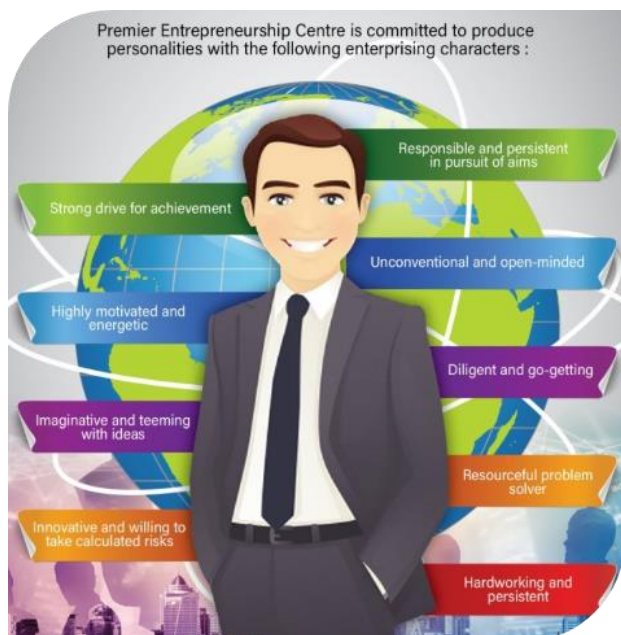

PB

CMET

An exemplary calibration centre that acts as a key enabler for an inclusive growth of entrepreneurial climate in PSA through its expertise in the biomedical equipment field.

PEOPLE

ABOUT US

In becoming the cream of the crop, PSA makes sure that its staff and students stand on a common ground and have shared values to dress for success. Having **enterprising characteristics** is considered as a key success in PSA; as it enables the staff and students to cope with the concept of volatility, uncertainty, complexity and ambiguity (VUCA).

TECHNOLOGY

ABOUT US

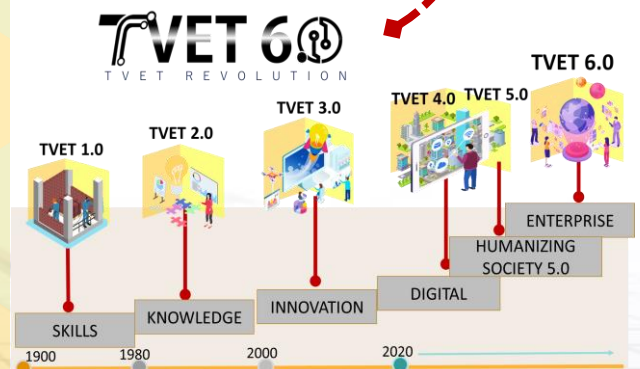

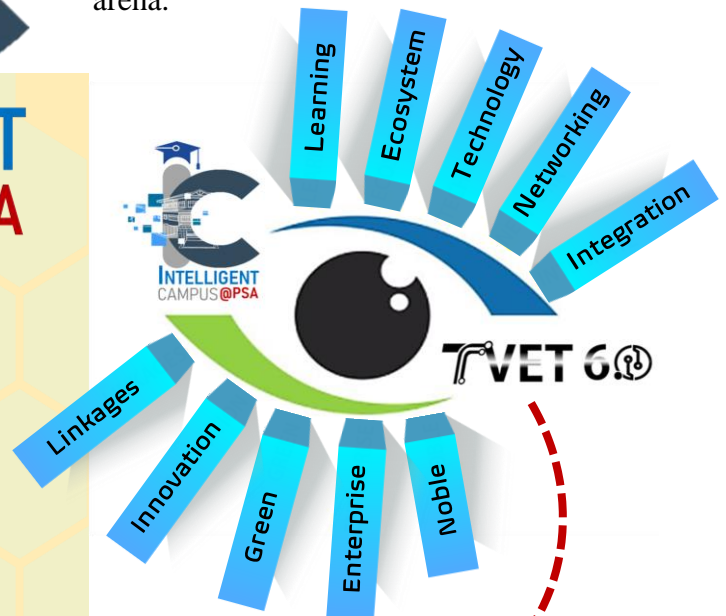

INTELLIGENT CAMPUS@PSA

11 Elements :

1. INTEGRATION
2. NETWORKING
3. TECHNOLOGY
4. ECOSYSTEM
5. LEARNING
6. LINKAGES
7. INNOVATION
8. GREEN
9. ENTERPRISE
10. NOBLE
11. TVET 6.0

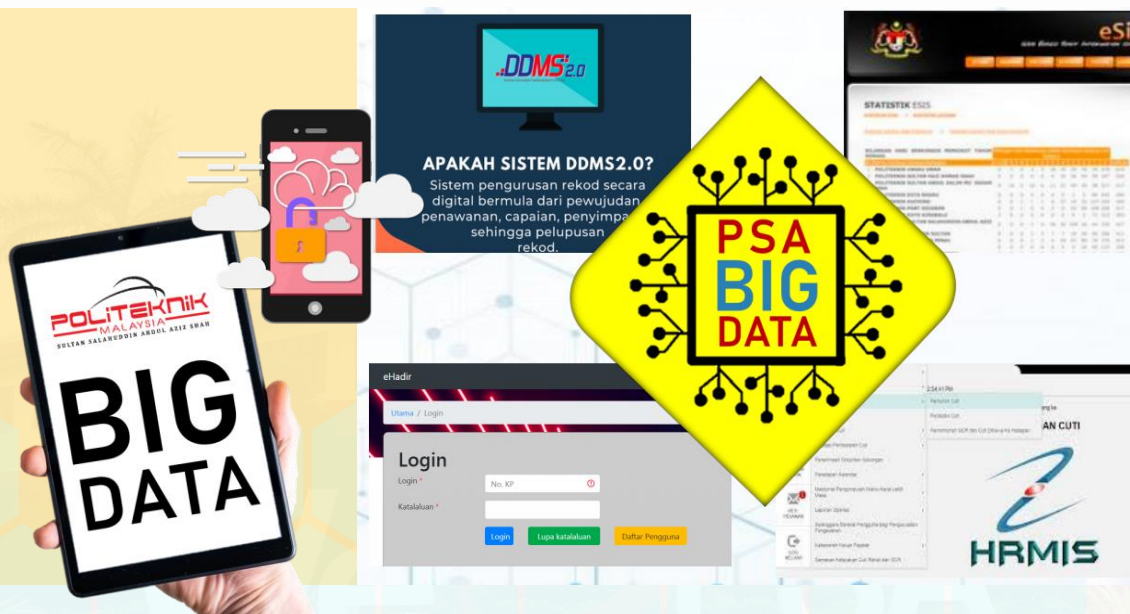

PSA has launched the **Intelligent Campus** concept that gives highlight on the entrepreneurial characteristics for TVET 6.0. It is a revolutionary approach adopted by PSA to introduce human capital diversification in the digitalization arena.

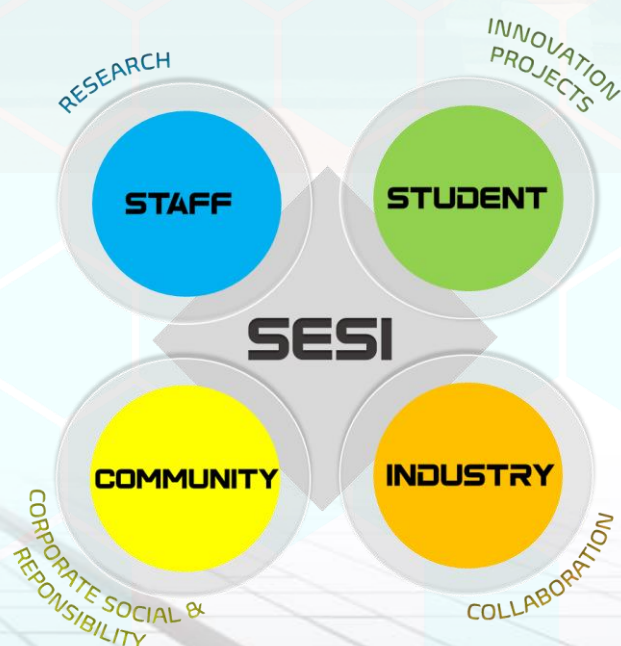

TECHNOLOGY

ABOUT US

As a leading TVET institution in Malaysia, digitalization is no stranger to PSA. Managing data on a day-to-day basis can be overwhelming. Therefore, PSA took a step ahead to incorporate **big data analytics** in its operation.

PSA is also committed to strengthen its entrepreneurial ecosystem through research, innovation and collaboration. This will benefit the staff, students, industry and community. Furthermore, PSA also focuses on the **Social Entrepreneurship and Social Innovation (SESI)** projects to benefit the community as a whole.

PREMIER ENTREPRENEURSHIP CENTRE

OUR STRATEGIES

Vision Mission

To inculcate enterprising characteristics among PSA students and staff

To create seed funding opportunities for business start-ups

To integrate Internet of Things (IoT) in entrepreneurship

To foster innovation culture in entrepreneurship

To establish impactful collaborative partnerships

Premier Entrepreneurship Centre (PEC) is established to support an extensive spectrum of learning and research initiatives, providing avenues for internal and external entrepreneurial educational programmes; as well as supporting entrepreneurship-driven innovations and social community development. As the entrepreneurial element is a focal point in the institution, the Premier Entrepreneurship Centre (PEC) is placed directly under the supervision of the director himself.

OUR STRATEGIES

Paving through its entrepreneurial agenda, PSA makes sure that it is in line with the government's aspirations.

OUR STRATEGIES

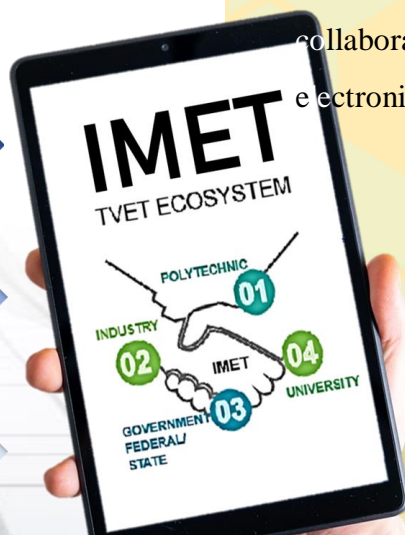

PSA takes pride in the establishment of the **Centre for Medical Electronics Technology**. The centre aims to become the catalyst in making Malaysia a high-income nation and the front-runner in Technical Vocational Education and Training (TVET).

The Centre for Medical Electronic Technology (CMET) was established in 2010 as the Centre of Technology (COT) under Premier Polytechnic flagship. CMET serves as a hub for references, research and innovation as well as a nexus for national and international collaboration specialized in medical electronics.

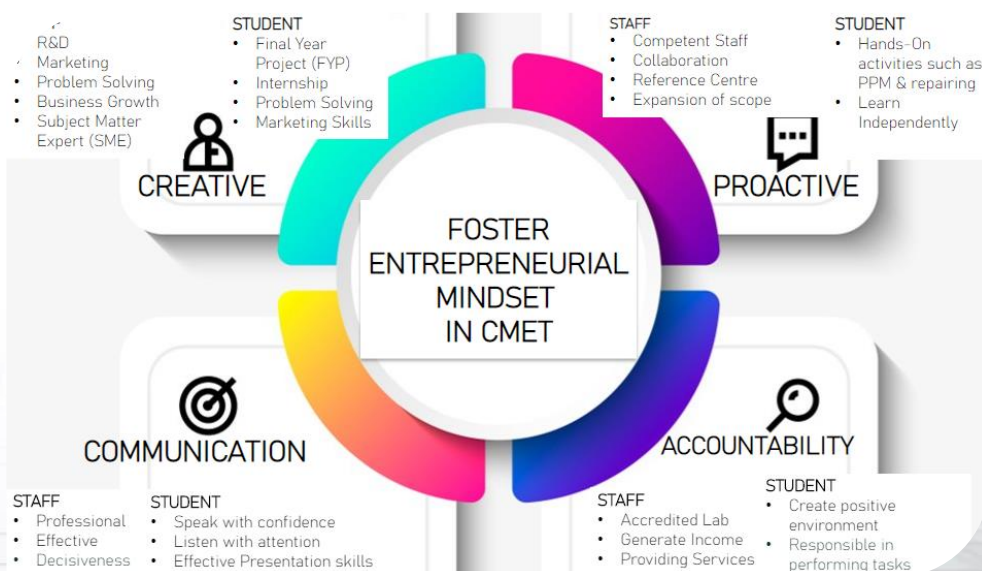

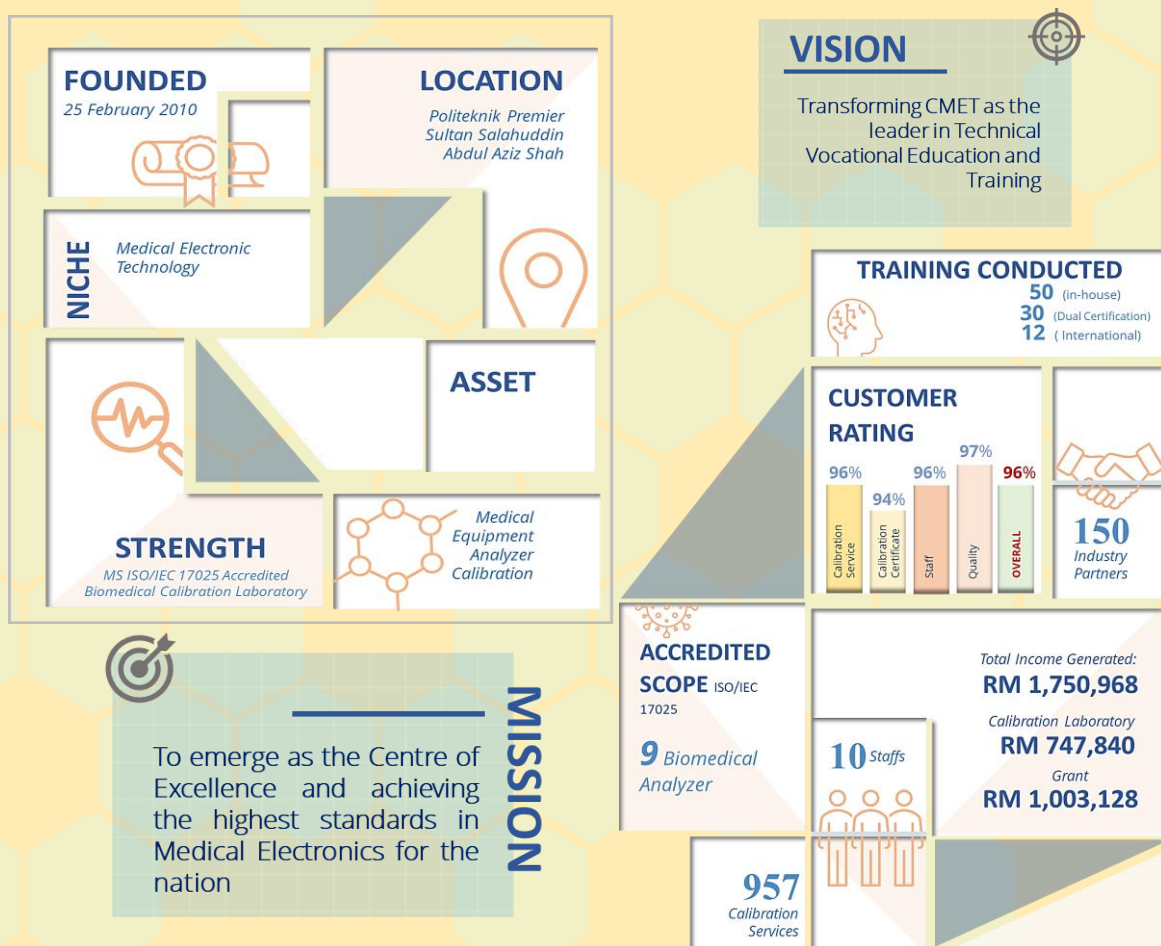

The formation of CMET is one of the initiatives of the Polytechnic Transformation Plan (2010-2015) to strengthen and restore public confidence in the polytechnic TVET education system.

Components of CMET

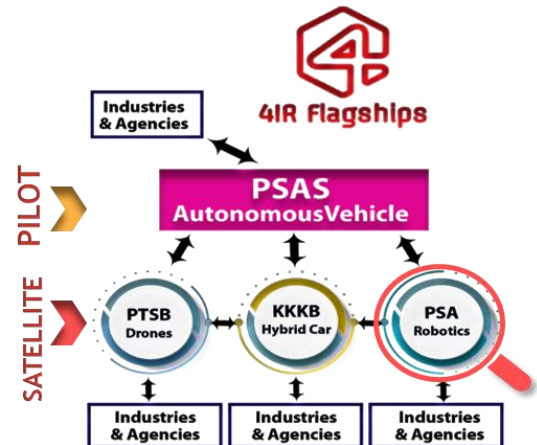

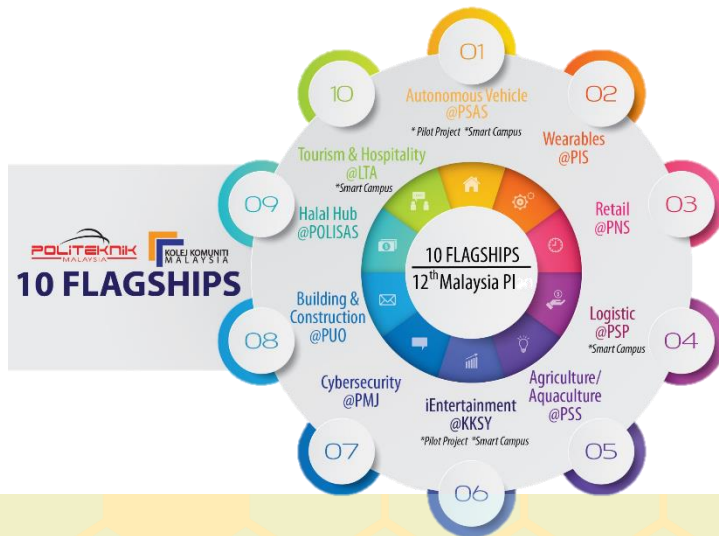

OUR STRATEGIES

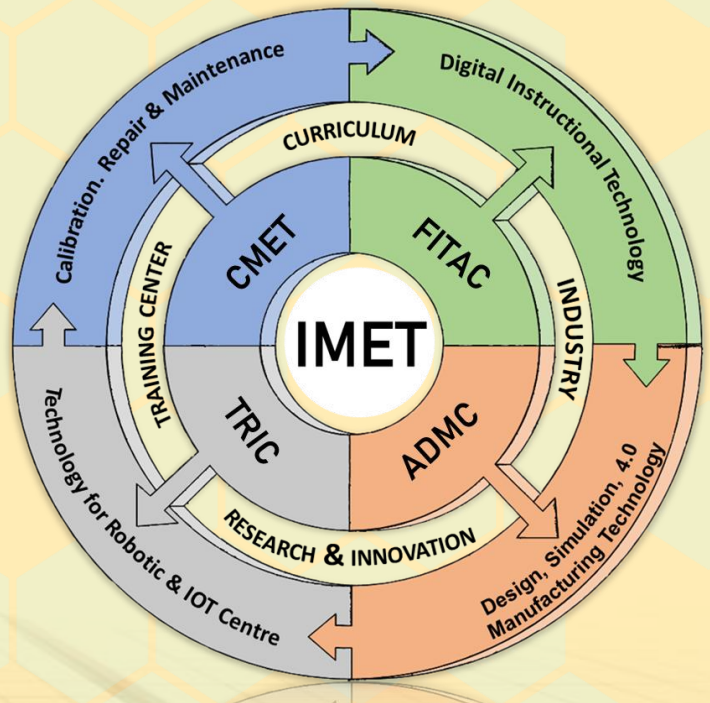

OUR STRATEGIES

Flagship Programmes @ Polytechnic Malaysia

Way forward

It is inevitable that the Industrial Revolution waits for no man. PSA foresees its bright future through the education and economic sectors as it is taking a bold move to establish the **Technology for Robotics and IoT Centre** and **Additive Manufacturing Centre** to bolster CMET's functions as the hub for Medical Engineering Technology.

OUR STRATEGIES

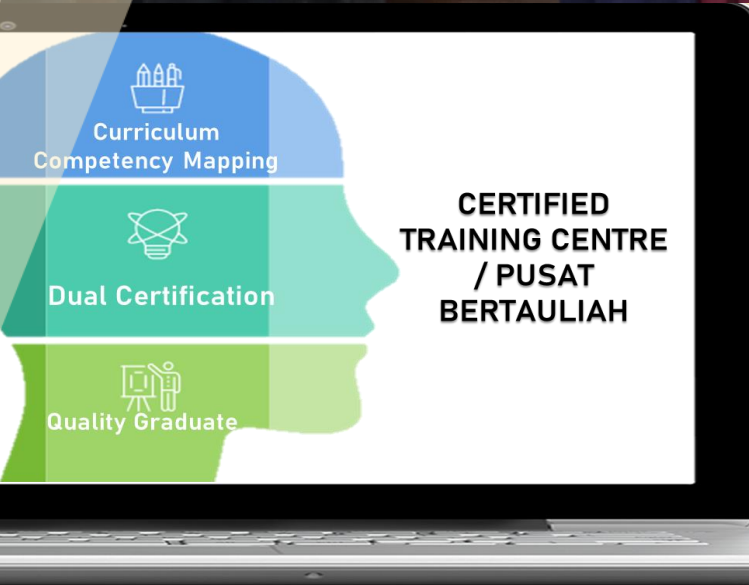

Centre for Research, Innovation and Commercialization (CRI) is established to assist the young entrepreneurs and their mentors in the aspect of product development and commercialization.

INNOVATION ECOSYSTEM

OUR STRATEGIES

A training provider authorized by the Director General of the Skills Development Department to run accredited programmes until the stage of certification.

STRATEGIC COLLABORATION :

6 PRESTIGIOUS PROGRAMMES

1. Certified Construction Site Supervisor (C&S)
2. Certified Construction Site Supervisor (Mechanical & Electrical)
3. Construction Traffic Management Officer
4. Certified Facility Management Executive (FME)
5. Smart Home Program
6. Kompetensi Pengurusan (Soft TVET)

FUTURE INSTRUCTIONAL TECHNOLOGY AND ACADEMIC CENTER

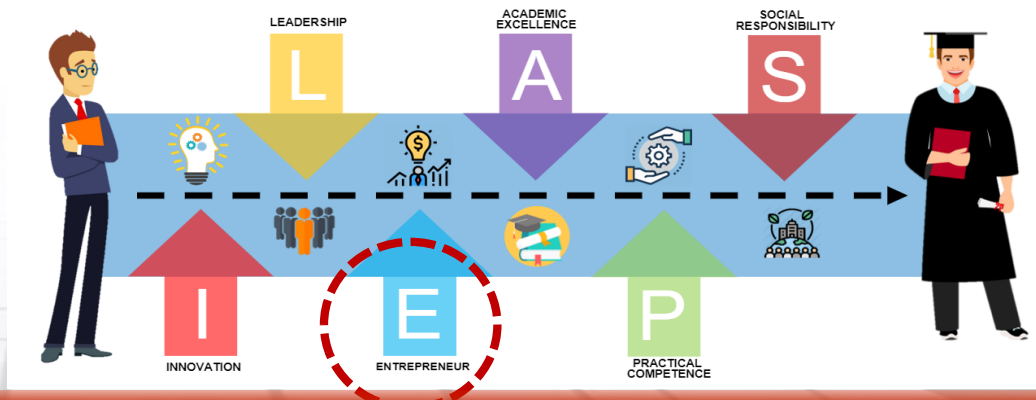

- 1 To empower the e-pocket & e-portfolio in digital learning
- 2 To establish a sound learning portal
- 3 To be the enabler for 'Learn from Home'
- 4 To strengthen linkages in digital networking system

OUR STRATEGIES

Devoted in making entrepreneurship a culture in PSA, the entrepreneurial component is emphasized in its working models. This is congruent with the Ministry of Higher Education's aspiration to rejuvenate the nation through entrepreneurship as tabled in the Entrepreneurship Action Plan for Higher Education Institutions (2021 – 2025).

Model ILEAPS – PSA Student Development

OUR STRATEGIES

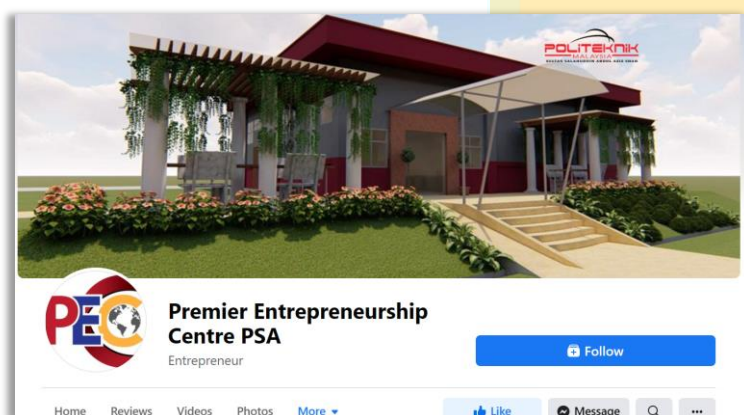

PSA has laid down a sturdy entrepreneurial footing through four basic strategies namely, Entrepreneurial Mindset & Culture, Business Engagement, Product Realization & Execution Mechanism. The institution is piloted by its two significant entrepreneurial models in establishing a sound ecosystem for its staff and students.

With the intention to indoctrinate entrepreneurial readiness among the students, PEC is given a slot for entrepreneurship briefing during the new intake's orientation week. This allows the centre to prompt the students' abilities and passion to engage in entrepreneurial activities. PSA adopts the CRAFT model as a reference in shaping the students to become entrepreneurs. Aside from academic excellence, PSA puts stress on instilling excellent communication and negotiation skills among students through its academic and non-academic agendas. Through the credited and non-credited Entrepreneurship Club offered in PSA, students are given real life experience on how to run and administer business. Attention is also given on financial planning and reporting to supplement their entrepreneurial abilities. With the advent of the digitalization era, students are equipped with digital knowledge to enable them to expand their business and engage with customers locally and internationally. This comprehensive cycle includes networking with industries, in which PSA receives facilities and training to help shape the students to become successful entrepreneurs.

OUR STRATEGIES

PSA ensures that it stays connected with its internal and external stakeholders via its social media platforms.

SIGNATURE PROGRAM : From Idea to Commercialization (FITC) is a signature programme by PEC which aims to produce successful and exceptional graduate entrepreneurs. Apart from the fact that FITC is designed as a curriculum-based programme, it also offers a collaborative partnership between PSA young entrepreneurs and SME's; under the patronage of PEC collaborating partners with the focus of armouring students with the know-how of becoming successful entrepreneurs. The effort is hoped to supplement PEC's Key Performance Index that is to produce at least 8% of graduate entrepreneurs each year.

CURRICULUM: Digital Entrepreneurship course is also embedded in the curriculum and is made as a compulsory course for the students of PSA to fulfil. It is seen to have benefited majority of the students and graduates of PSA as it aids them to brave out Covid-19 pandemic through their online businesses.

COMPETITION: PSA is vigilant in enriching the staff and students' skills and talents through local and international competitions in tandem with enterprising characteristics instilled in the institution such as innovative, creative, risk taker, goal oriented.

CO-CURRICULAR: In 2016, MyAgrosis Young Entrepreneurs Club (MYEC) was established in collaboration with FAMA. The objectives are to enhance the students/club members opportunities for learning-by-doing through action and experience. Many programmes have been arranged and executed by the club to carry the institutions entrepreneurial agenda. In general, MYEC has successfully groomed numerous entrepreneurs among students and graduates. Upon graduation, some of them have become job creators with new business start-ups.

TALK: Numerous programmes were arranged for the staff and students to support their enterprising characteristics and to help them cope with IR 4.0

NETWORKING: Collaborations have been sealed off with various agencies and industries as strategic partners to further strengthen PSA entrepreneurial ecosystem.

OUR MENTORS
OUR STAFF
OUR INCUBATORS

OUR IDOL

It is such an honour for PSA to have a director with very clear entrepreneurial aspirations. A PHD holder in Entrepreneurship from University of Hull, United Kingdom (2010), Dr Mohd Zahari bin Ismail is also the patron for the central zone's entrepreneurial activities.

DR MOHD. ZAHARI
PSA DIRECTOR
Chairman of
Entrepreneurship for
Central Zone

OUR MENTORS

OUR COMMITTED MENTORS

With specific focus to groom its staff with entrepreneurial characteristics, the institution puts stress on the staff's upskilling, reskilling and cross skilling. This effort enables the staff to deliver customised courses for lifelong learning.

OUR INCUBATORS

K-SHOPPE CHILLAX

The incubation facilities available in PSA are guided by fervent and business minded staff.

K Shoppe Chillax is an effort to create entrepreneurial flair, innovation and agility in PSA. It opens up opportunities for students to have real-life experience in operating a business.

Under this incubator, students are given necessary skills and trainings from setting up a business, to marketing, to incorporating IoT in the business.

OUR INCUBATORS

INCUBATOR PRINTING

The establishment of the PSA Printing Incubator is one of the platforms to realize the aspirations of the Sultan Salahuddin Abdul Aziz Shah Polytechnic (PSA) to encourage and strengthen the development of a more organized and holistic entrepreneurship platform for students.

On that account, to encourage more students to venture into business, the establishment of the Printing Incubator is seen as one of the interesting platforms for PSA students.

OUR INCUBATORS

The AgroWorld Incubator has provided an educational and training ground for Entrepreneurship Club and Environmental Friendly Club members on the possible business opportunities that they can venture in. This project is directly supervised by FAMA and the Selangor Agriculture Department.

Among the plantation projects involved are rock melons, tomatoes, chillies and vegetables.

ABOVE ALL

The spirit of teamwork is highlighted in the planning and execution of programmes in PSA. Each department and staff bring forth their distinctive entrepreneurial strength to the table. With strong partnership with external stakeholders, many programmes and events are carried out successfully.

The 4th International Conference on Research in TVET Studies (ICOR - TVET 2019) which took place on 9.9.2019 at Pamulang University, Indonesia has achieved its objectives.
